

## Purchasing Stata

You will learn and use statistical software called Stata in this class. Stata is available on all the computers in the Social Science Computing Lab (HW 607) but is not readily available at other computer labs at Hunter. For your convenience, especially because open hours in the SSCL are limited, Stata is made available to you (and all students, faculty, and staff at Hunter College, CUNY) for purchase at reduced rates (GradPlan pricing).

The prices represent a substantial discount off the already-discounted academic price of Stata. The software offered through the Stata GradPlan is NOT student software; that is, it is in no way limited in terms of features.

There is a variety of purchase options, described below. If you in the BA program in Economics or plan only to take one semester of Econometrics, you can purchase Small Stata with an annual license for \$45. If you are in the BA/MA program, in the MA program or plan to take more than one semester of Econometrics, you should purchase Intercooled Stata software with a perpetual license for \$145.
